

Malaysia Steel Works (KL)

Recommendation:

BUY

Stock Code: 5098 Bloomberg: MSW MK Price: MYR0.94 12-Month Target Price: MYR1.10 Date: June 1, 2010

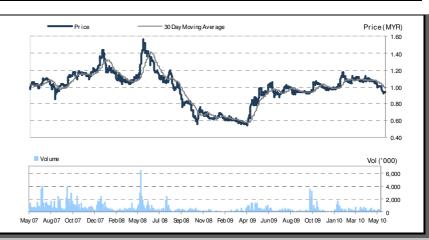

Board: Main

Sector: Industrial Products
GICS: Materials/Steel

Market Value - Total: MYR193.0 mln

Summary: Malaysia Steel Works (KL) (Masteel) is a steel producer with a capacity of 800,000 tons per annum (tpa). It produces steel billets and bars that are sold to downstream steel companies for the manufacturing of bars and other long products for the construction sector. The stock is a component of FBM EMAS.

Analyst: Su Peng Ng

Results Review & Earnings Outlook

- Masteel's 1Q10 results were below our expectations as margins were lower than expected. Net profit of MYR6.4 mln accounted for only 15% of our previous 2010 estimate.
- 1Q10 revenue surged 48% YoY on the back of higher demand and average selling prices (ASPs), as global and domestic economies rebound. With a lower average raw material cost for 1Q10, Masteel turned in an operating profit of MYR9.7 mln compared with a loss of MYR26.8 mln in 1Q09.
- Improved ASPs boosted 1Q10 revenue marginally over 4Q09.
 However, due to rising raw material costs, operating profit fell 31% QoQ.
- We look for Masteel to post better results as the year progresses, as steel prices adjust to higher iron ore and scrap prices in 2Q10. Masteel has also been producing at full capacity in the last few months, indicating demand is strong. In addition, we anticipate an increasing pace of domestic infrastructure rollout in 2H10, which should boost Masteel's second half earnings.
- Nevertheless, with poor 1Q10 results, we adjust our 2010-2011 estimates after imputing a higher cost of sales. Our new 2010 and 2011 net profit estimates are MYR30 mln (from MYR42.1 mln) and MYR36 mln (from MYR51.2 mln) respectively.

Recommendation & Investment Risks

- We lower our recommendation on Masteel to a Buy (from Strong Buy) with a lower 12-month target price of MYR1.10 (from MYR1.35).
- Our target price remains derived using a blend of PER and P/B methodology. We utilize a PER of 6x (from 7x) and P/B of 0.5x (from 0.6x) against our estimated 2011 (rolled over from 2010) EPS and BVPS respectively. The lower multiples reflect lower peer valuations.
- Masteel recently proposed an issue of 1 warrant for every 2 shares held to raise MYR21.4 mln to fund working capital. The dilution from these warrants on the group's FY11 EPS is a significant 28%. We believe that Masteel may be preserving its gearing levels in anticipation of its new MYR300 mln downstream project that is expected to come in by 2012. Despite the longer-term plans, we believe the dilutive aspect of the warrants issue will possibly cap upside in the near term and is a factor in our downgrade.
- Risks to our recommendation and target price include lower steel prices, higher-than-expected raw material prices and lower-thanexpected demand.
